

CYANIDE CASE HEARING

South African Commission Here to Take Testimony.

GREATEST PATENT BATTLE

PRESIDENT CONTEST DWARFS IN IMPORTANCE TELEPHONE CASE.

Local Mining Men Are to Be Placed Upon the Witness Stand in the Interest of the MacArthur-Forrest Patents—Utah Is Deeply Interested on Account of the Recent Filing of a Suit Against the Mercur Company to Compel the Payment of Royalty—Anticipated That the Struggle of the Commission Will Consume Several Days—Great Activity in American Fork Canyon Mines Caused by Recent Location of Gold Properties by Salt Lake People—Company Is to Be Organized and Development Work Commenced on an Extensive Scale—General Mining News.

For the remainder of the week, at least, the parlors of the Knutsford will be transformed into judicial chambers for the sitting of the special commission, sent out from the courts of the South African republic for the purpose of taking testimony in the now famous cyanide patent cases, commenced by the government at the instance of many mine owners who have determined to break the latter's patent wide open, if possible, in order that they may escape the payment of the required royalty. This commission arrived in the city yesterday in a special car over the Rio Grande Western and all of its expenses are borne by the owners of the cyanide patents, which have become so valuable as the use of the chemical is extended to the various mining districts of the world. Edward Kent of the firm of Butler, Stillman & Hubbard, of New York City, is the commissioner, while Charles W. Truslow, of New York, represents the plaintiff in the action, the government.

James Campbell, and Walter D. Edmonds, of New York, appears for the cyanide patent people. The other members of the party are Thomas Goad, of Denver, who represents the Gold and Silver Extraction Company of America (limited), the owner of the MacArthur-Forrest patents for this country; J. Noel Sparks, of London, one of the engineers of the MacArthur-Forrest companies; Arthur B. Cook, of New York, also stenographer of the commission, and Dr. Henry Weiss, of New York, who represents the parties contending against the patents in South Africa. Mr. Truslow and Dr. Weiss have previously taken the oath of the present commission, taken testimony for the plaintiff, among the witnesses examined being Professor John Williams, until recently general manager of the Ilex syndicate here.

This commission is being carried on at the instance and expense of the owners of the MacArthur-Forrest patents, and the object is to prevent the South African republic from making use of the practical mining men and mining engineers in this country as to the novelty of the MacArthur-Forrest cyanide patents, as well as to the general question of this process to the low grade, gold-bearing ores of America.

After commencing his sitting in New York the commission went to Denver, where numerous witnesses were examined at the Brown Palace hotel during the past three weeks. Among those who were examined were such well known men as John A. Grant, who is one of the owners of the Osmore and Grant Smelting Co. It is through his partner, D. H. Moffatt, that the representative commission have been accredited to the leading mining men of this section, the MacArthur-Forrest process having been adopted by Messrs. Moffatt, Smith, who have taken license themselves under its patents. Among the many other witnesses who testified in favor of the patent at the Denver hearing were Albert Low, a well known chemist and metallurgist; Edward B. Kirby, professor of metallurgy; A. A. Blow, who located the Leadville gold belt; W. S. Ward, well known in the interests of Colorado at the World's Columbian exposition, and others, including many of the numerous licensees of the American company.

The commission is stopping at the Hotel Knutsford, and will probably during the next few days examine a number of witnesses here on behalf of the patents. The title of the suit under which the patents of the MacArthur-Forrest process are attacked, is James Hay vs. South African Republic, and the case is to be tried before the court of last resort in the South African republic, which is titled by the Dutch. All of the testimony taken must be submitted to the Dutch before submission to the courts. It is estimated that the amount involved in this suit alone is \$1,000,000 annually, represented by the payment of royalties. Practically all of the South African cyanide users have now discontinued the payment of the guaranteed royalties, pending the outcome of the suit now before the courts. The issue involved is perhaps greater than those of any other patent litigation, not excepting that over the Bull telephone inventions. Already the English courts have decided in favor of the patent for the dilute solution of cyanide, partially reversing the judgment of the court below. This suit in the South African courts and the Mercur case here are still pending, however.

It is the presence before the Utah courts of the latter case which gives the drama of the commission much peculiar and widespread local interest. The Gold and Silver Extraction Company of America (limited) has sued the Mercur Gold Mining and Milling company of America (limited) for suit for all of the other cyanide users company to compel the payment of royalties and this suit is to be made by the Mercur company, and another defendant in the United States. It has come before Justice Merritt very recently and the demurrer of the defendants was sustained, the plaintiff company being forced to file an amended complaint, which it has just done. The second complaint is also looked upon as being vitally defective by the attorneys for the Mercur company, and another demurrer is to be laid before the court in the next few days. It will take the same stand as did the other. So far the trial of victory has perched upon the banner of the defendant, and the cyanide users in the battle have been tried on here. Mr. Truslow and Dr. Weiss are here in the interest of the mine owners and the former will cross-examine all of the witnesses placed upon the stand by the other side at the coming hearings, as he also did at Denver and New York. The doctor is a recognized authority on the subject under discussion and lends material aid to the attorney. It is anticipated that Frank Pierce and Judge Dickinson, attorneys for the Mercur company, will take part in the proceedings as assistant counsel to Mr. Truslow.

The list of witnesses to be examined at the hearings here was not made public last night, but must be sent to the attorneys for the plaintiff before the time for the sessions of the commission to commence, which is 11 o'clock this morning.

AMERICAN FORK MINES.

They Are Just Now Receiving Much Attention.

Interest in the mines of the American Fork canyon district has been revived by recent developments there and within the next few days a company will be organized in this city for the purpose of commencing a development of a group of gold claims just located by the members of the company. But for the absence of Probate Judge McNally, the articles of the company would have been filed last night. The gentlemen at the head of the movement for the development of the properties are Attorney Elmer B. Jones, G. C. Harkins and W. A. Rhodes, who recently located the group of claims just mentioned on Miller Hill, which claims are about to be worked on an extensive scale. The gentlemen named have just returned from the district and are extremely enthusiastic over the discoveries which have just been made in the canyon and are still being made almost daily.

In a few days of mining in this territory, the properties in American Fork canyon were good producers, the ores being very high grade in silver and lead. One of the mines, the Miller, was producing gold and silver in such quantities that the company is being organized to develop a branch line of road from the Union Pacific. Gold ore which gave returns in the yellow metal of but in the neighborhood of \$100 per ton, is being produced in such quantities that the company is being organized to develop a branch line of road from the Union Pacific. Gold ore which gave returns in the yellow metal of but in the neighborhood of \$100 per ton, is being produced in such quantities that the company is being organized to develop a branch line of road from the Union Pacific.

These discoveries have worked up a great sensation in mining circles, and the district is now full of prospectors. Park City having sent in a large number. Many locations have been made, but the excitement is not confined to the gold properties. On the other hand, many of the old silver-lead properties are being reopened and some are being shipped out of the canyon. During the next few days a number of Salt Lake people who are interested in the mines of American Fork will go down for the purpose of inspecting their properties, among them being Messrs. McMillan, Shaughnessy, Daly, Conklin and others.

MERCURY ALL ACTIVITY.

Development Work Showing Up Greater Riches Every Day.

There is no district in the territory where development is so active as out in Camp Floyd and each day's work shows up the riches of the district in greater proportion than before. The three mills are operating regularly and the monthly output of gold is not less than \$75,000. Splendid progress is being made with the erection of the necessary buildings for the Sunshine mill, which will be one of the most complete in the district. The return to the city last night Judge Sherman stated that the ore bins are now completed and the other framework is going into place. The times are so good in the district that everything about the works is to be of the most substantial nature. The developments in the property are of the most encouraging nature and the new bodies being shown up are ever increasing in richness.

Attorney Street and General Penrose have returned from the district, where they have been inspecting the gold bodies with very promising results. Their next door neighbor, the Rover, is showing up in splendid shape and word came from the camp yesterday that the mine was producing gold in such quantities that the company is being organized to develop a branch line of road from the Union Pacific.

Advances received by Captain Rhodes in the district for the air pipe line of the district might be rushed to completion, the working force on the Ophir-Mercur pipe line was given a change during the week, but it is anticipated that the completion of the system will be completed down to the Sunshine within the next few days. The south end is now at the Glencoe property. Advances received by Captain Rhodes in the district for the air pipe line of the district might be rushed to completion, the working force on the Ophir-Mercur pipe line was given a change during the week, but it is anticipated that the completion of the system will be completed down to the Sunshine within the next few days.

The south end of the district is now the possession of a place where travelers may secure a square meal, the boarding house at the Sunshine being completed and open for the accommodation of the district. It is not a regular hotel, but meals are served to outsiders when requested. A saloon has also been opened at the south end, being the property of the district. The Glencoe group is now being worked in a number of places by Mr. Radtke, who is of the opinion that the former development work was thrown away through the wrong formation being followed. Experts who have examined the property are confident that values will be encountered with development of a systematic nature.

Recent assays made from the ores from the incline on the Red Cloud, which is located in the vicinity of the Sunshine and near the Miller, have given very satisfactory results, the gold content running from a trace to \$9. The owners of this property have just taken a contract for one hundred feet of work and active operations are to commence at once—in fact, have already commenced, in a measure. It is their intention to pump the incline to the surface and if the main ore body is not then encountered, to return to the old shaft and, after sinking some distance, do some extensive drifting and cross-cutting.

The Mercur refinery is again in operation and gold bars will be shipped this time instead of product. The mill is taking care of between 150 and 160 tons of ore daily, and the Salt Lake & Mercur railroad is having all it wants to do in taking care of the delivery of this ore and handling the other products and passengers. With all of its activity, the busy mill until midday of Wednesday in cleaning up the work. Manager Jacobs came in from the camp last evening and reports everything operating smoothly and an ever increasing business.

MINING STOCK MARKET.

There Has Been a Perceptible Improvement. This Week.

James A. Pollock will say in his Weekly Mining Share Letter under the date of July 19, 1895: The mining share market opened up fairly strong this

week, and showed a perceptible improvement at the close. There were no notable advances in prices and even the payment of over \$100,000 in dividends during the week by three companies, did not startle the market. The buying movement seems to be confined wholly to investors, who are purchasing cautiously and with good judgment. Speculation is restricted by the summer season, otherwise I think trading would be more extended in this market than it has been for a number of years. I issue this week a brief pamphlet upon the "Resources or Mercur," or better known as Camp Floyd district, copies of which will be mailed clients free upon application.

There is not much trading in Ajax, but the market is steady at 15 cents bid and 30 cents asked. Alliance is showing a good deal of activity and shares selling around \$1.10. It is difficult to understand just where the stock comes from, but it is a fair presumption that the majority of stock offered is being taken in by insiders. Anchor is beginning to show some life, and was more frequently traded in this week than for some time past. I am firm in my belief that the company will make the best showing during the coming months than it has for some years and think the stock should be taken in at present quotations. The minority stockholders of the Bogan company are preparing to institute suit relative to the recent assessment. The peculiar, to say the least, manipulation of the Bogan stock has been of a kind to call for unfavorable criticism, and a strict accounting of the company's affairs should not be objected to by the officers and insiders.

Bullion-Buck came to the front again this week with a dividend of 50 cents per share paid on the 15th. This dividend of \$50,000 makes a total of \$175,000 paid in dividends. There is in strong demand and a number of large blocks of stock are known to be upon the market. In view of the heavy dividends being paid, and the fact that the company has been considered in the nature of a close corporation this free offering of the stock is rather surprising. Can it be that the well-to-do stockholders are concluding that the property is being pushed too fast for its own good?

Centennial-Eureka paid its regular dividend of \$1 per share, or \$300,000 on the 15th. Total dividends paid, \$50,000. Out of this amount \$430,000 has been distributed among the stockholders this year. Comstock continues to send in highly-colored reports of development, but there is no more movement in the shares. Dalton reports a discovery of new ore bodies and the shares moved up a point in consequence. Daly is likely to resume his place as a prime favorite in the investing class in this market. Buyers at the present prices cannot make any mistake. Daly-West was in demand and sold at \$6.75, closing at \$5.50 and \$6.75 asked. Dalton is showing much strength. My prediction that the shares would sell at \$7.50 by October 1st, is likely to be verified long before that date. The mine is making a heavy profit and is looking well. In view of the prospects of the company the shares are purchased around 15 cents. Harpeth is steadily and actively being worked and \$1.10 asked. Trading very limited. Morgan, quiet.

The Mercur will pay its regular dividend of 12 1/2 cents per share tomorrow. It is in strong demand and in view of the great showing the mine is making and reported additions of late to reserves of ore, the shares look cheap at \$4, not only in comparison with the other mines, but for a lengthy continuation. Ontario is indulging in another quiet period, a time of rest preceding the corresponding activity and an advance in price. Silver King is at \$4.50 and closed at \$4.50 bid and \$5 asked. Tetra is pushing ahead with development work and the shares are an excellent gamble at the present quotations.

Placing the Pump.

The new water system of the De Lamar properties in Ferrisburg district is now completed with the exception of the placing of the pump. Shipment of this machine was made to the south some ten days ago and it is anticipated that within the next few days word will come to the effect that the system is operation. The new source of water supply is eight miles from the mine and a pipe line of length is to convey the flow to the mine. The pump is to be located at the springs and will be used in forcing the water over a grade, from the top of which it will run by gravity.

Investigating Water Supply.

Messrs. Bamberger, Cannon and Beck, of the Bullion-Buck directory, went out to Tintic last evening for the purpose of inspecting the properties and deciding upon some changes in the water system, in the hopes of increasing the flow. The mill is now operating, but the supply of water is low and some improvements must be made in order to ensure a regular flow. The gentlemen will return this evening.

Mill Has Been Shipped.

Major Silva came in last evening from Stewart No. 2, where the extensive alterations are being made in preparation for the placing of the new gold-saving machine. Upon his return he received advice to the effect that the Alesing mill, which is to go on the property, has been shipped from

Butte and will arrive in Bingham within the next three or four days.

Ilex Bullion Shipment.

One car of bullion from the Ilex smelter, the value of which was \$1,400, was received yesterday by Hannauer and sent to the Omaha and Grant smelter at Omaha. The ore shipments from the Ilex mine are in the nature of experiments to determine the cheapest way of treating—whether to send to the valley smelters or have the same worked at the Leamington smelter. The receiver of the latter is willing to treat the ores, but the owners will demonstrate the proposition stated are making any arrangements.

Silver Goes Up a Point.

The white metal went up one point yesterday and sold at 67 cents even. Lead remains stationary at \$3.25.

Stout Mill Matters.

Excavation on the site for the Stout mill is going on rapidly and is being rushed to an immediate completion. Material for the mill is being sent to the place and work on the structure should begin in a short time.

Bingham Ore Shipments.

Superintendent Dugan, of the Colorado mine, of Bingham, came in yesterday and states that the shipments from the mine are now 300 tons per month. The recent completion of the air connection gives the mine splendid ventilation and the property is now in first-class shape. Mr. Dugan says the shipments of ore from Bingham are heavier than they have been for years. The shipments are about four-

THE INDUSTRIES OF AMERICA. SCENES IN THE WORK SHOP OF A BALL AND CHESS MEN MANUFACTORY

teen cars per day, besides about fifty tons per day which are sent out in wagons.

Ore and Bullion Receipts.

The Spanish mill at Bingham yesterday sent in another gold bar to the Bank of Salt Lake, the value being \$1,400.

Pennsylvania Lead Works received.

Silver and lead ore, \$1,500.
McCormick & Co. received: Silver and lead ore, \$1,500.
T. R. Jones & Co. received: Silver and lead ore, \$2,800; Germania Bullion, \$3,500.

THE LAWYER'S BEST FEE.

"Fee simple, and the simple fee, And all the fees that fall,
I have no more to say to thee, Thou best of fee-men all!"

That is what a lawyer wrote in his wife's album. He kept her in the best of health and humor by providing her with Dr. Pierce's Favorite Prescription for those seasons of sickness, dizziness and backache, which are the peculiar lot of the female sex.

A minister at Okmulgee, Creek Nation, Ind. T. says: "I am pleased to stand as witness for your 'Favorite Prescription.' My wife was an invalid for about 17 months. Every remedy was used for her health and money spent in vain, but no relief could be obtained. Your 'Favorite Prescription' was recommended to me and I obtained one bottle. Her health soon began to improve, and she was actually cured by it. It is a wonderful medicine. Every invalid lady ought to obtain it."

Rent new bicycles. Co-op W. & M. Co., next to theatre.

SALES IN OAKLEY.

Mrs. M. Jackson, of Butte, Mont., purchased three lots in block 11, Oakley, for \$80.
Louis Odman, who bought two lots Wednesday, purchased \$100 more yesterday in block 11 for \$75, and Mrs. Kate Odman, of Salt Lake City, bought one lot more in block 11 for \$12.

A Sufferer Cured

"Every season, from the time I was two years old, I suffered dreadfully from erysipelas, which kept growing worse until my hands were almost useless. The bones softened so that they would bend, and several of my fingers are now crooked from this cause. On my hand I carry large scars, which, but for

AYER'S

Sarsaparilla, would be sores, provided I was alive and able to carry anything. Eight bottles of Ayer's Sarsaparilla cured me, so that I have had no return of the disease for more than twenty years. The first bottle seemed to reach the spot and a persistent use of it has perfected the cure."—O. C. DAVIS, Wautoma, Wis.

TALK WITH DICKINSON.

The Union Pacific Magnate on Railway Affairs.

SITUATION ENCOURAGING

OTHERS WHO ARRIVED WITH HIM ON THE SPECIAL.

All Report That Business is Picking Up—Mr. Derrah, of the Missouri Pacific, Will Go to Kansas City—At the Lake Resorts—The Latest By Wire—Local Notes.

A special train with Union Pacific magnates arrived in this city last evening at 5:15, and half an hour later pulled out for Millford.

The train was made up of one baggage car, and private cars 911, 014, 012 and 013 and a greater number of Union Pacific officials were aboard than has ever at any one time visited Salt Lake. In the party were General Manager Dickinson, J. H. McConnell, superintendent of motive power and machinery; General Superintendent Bancroft, Superintendent Maloy, of the Wyoming division; Superintendent

Superintendent Larry Maloy, of the Wyoming division, said: "Business down our way is good, and we have no reason to complain. The outlook is bright. We have been over some time putting on men in all the shops, but so gradually that the public has not been made of it. That policy will be carried out, I am confident, and the departments along the system everything has a brighter air than when I was out here before, and the brightening process will continue, I am positive," and after looking as though he had the future sized up carefully and satisfactorily.

The Wyoming Division.

Superintendent Larry Maloy, of the Wyoming division, said: "Business down our way is good, and we have no reason to complain. The outlook is bright. We have been over some time putting on men in all the shops, but so gradually that the public has not been made of it. That policy will be carried out, I am confident, and the departments along the system everything has a brighter air than when I was out here before, and the brightening process will continue, I am positive," and after looking as though he had the future sized up carefully and satisfactorily.

The Idaho Division.

Superintendent Van Housen, of the Idaho division, here broke in with: "No need to approach me—The Herald showed up what Idaho is doing only a few days ago. Good report! I should say so. I am confident that the corresponding month of last year, there you have it. But to that report you may annex the information that just now we are sending coal to Butte and Anaconda in a way that astonishes even us. Besides the coal in all regular orders, there is a standing order for thirty cars daily to Butte, and with forty daily on standing order to Anaconda, there's some coal going up there."

And having so delivered himself, "Van" proclaimed that he was hungry and the crowd had to look at the car, was cut out here, he remaining over.

Superintendents Maloy and Van Housen went north last evening on the 7 P. M. train, though the former will return from Ogden today and remain over with Agent Dickinson's party while here.

Passenger Agent Burley met the visiting magnates on arrival, and though General Manager Dickinson strongly insisted on his joining the party, Dave begged off with the excuse that "there was a whole lot of school marm's here yet to be looked after"—whereupon the general manager smiled and remarked: "In that case, of course, I cannot insist."

On the arrival of the visiting magnates from the south, which will probably be this evening, they will set about doing the city and lake in their enjoyment, and the longer they stay over the different lines. After that they will go direct to Omaha.

MISSOURI PACIFIC CHANGES.

S. V. Derrah Goes to Kansas City on August 1st.

S. V. Derrah, for a long time the commercial and passenger agent of the Missouri Pacific-Iron Mountain line, is booked for promotion. On August 1 the gentleman will leave for Kansas City, where he will assume an important position for the same lines. Mr. Derrah will be succeeded by H. B. Koser, contracting agent at Omaha, who is promoted.

Mr. Derrah is one of the most popular railroad men in Utah. He came here in 1887 and in the discharge of his important duties has always been playful, affable and judgmental. His family will remain here for some months yet.

AT BEAUTIFUL SALT LAKE.

The Popular Resort is Doing a Big Business.

Salt Lake is doing a big business just now, and yesterday the attendance was augmented by the presence of 114 Ogden people.

WESTERN ASSOCIATION.

Nearly All Lines Represented at the Meeting Yesterday.

CHICAGO, July 18.—Nearly all the lines of the Western Passenger association were represented today at the adjourned meeting to consider the sale of excursion tickets. It was generally agreed that there would be no chance for the scalping of the regular rates. Chairman Caldwell was given authority to consider the sale of excursion tickets from the tickets of any one road, or any number of roads, to call attention to such road or roads to the matter and they will be made to protect competitors so that there will be no necessity for the reduction of one way rates anywhere to meet the Christian Endeavor tickets.

Holding Its Own.

Garfield Beach is attracting a great many tourists, and there have recently been a number of excursions to that resort from different parts of the territory. Every day of this week there

What Does This Mean?

These Little Rollers save one horse.

What Little Rollers?

Why, the Little Rollers in the Deering Pony and Steel Binders and Mowing Machines. Rollers have taken the place of friction bearings and have reduced the friction from thirty to sixty by changing sliding contact to rolling contact.

In all things highest excellence is simplicity, and as this is the case with the Deering Harvesting Machinery, they have, through years of toil and hard labor by the inventor and manufacturer, reached the top of the ladder, whereby they can be termed the Champions of the World. Silence is golden, and an argument over silence, like an argument over the merits of the Deering Machinery, is hard to beat.

Noise means wear and wear means waste. Deering Bicycle Bearings Run Noiselessly.

The Deering Harvesting Machinery is on exhibition and for sale by

Geo. A. Lowe,

SALT LAKE CITY, OGDEN, LOGAN.
Watch the Circus Parade.

Since 1891—enormous crops. Times are on the pick up, most certainly.

The Cheyenne Shops.

"How about the Cheyenne shop being thrown wide open August 1, as has been announced in some dispatches?"

"Those statements are groundless, as we are not going to enlarge forces at any one point save as the additional work may demand. Any increase is purely contingent upon the future. We have been over some time putting on men in all the shops, but so gradually that the public has not been made of it. That policy will be carried out, I am confident, and the departments along the system everything has a brighter air than when I was out here before, and the brightening process will continue, I am positive," and after looking as though he had the future sized up carefully and satisfactorily.

FURNERAL OF A. N. TOWNE.

Occurred at San Francisco Yesterday and Was Attended by Thousands.

SAN FRANCISCO, July 18.—The funeral of A. N. Towne, second vice-president and general manager of the Southern Pacific railroad, took place today and was attended by thousands of railroad officials, employees and friends. The pall bearers were the old-time Southern Pacific conductors on the road. The directors of the Southern Pacific, prior to the funeral, met and adopted resolutions eulogistic to the dead railroad manager.

Canned Horse.

SAN FRANCISCO, July 18.—The incineration of a horse, which was received by a proposition from Portland, Ore., taking that route on canned and pickled horse meat in earthen pots, was established between Portland and all cities of the United States. This application for new rates of live horses from Arizona common points to Oregon.

Railway Notes.

A Raymond party of fifty people left here for the north last night.

The Union Pacific will run a special train from Idaho Falls to Pocatello on the 24th of July, and also one from Pocatello to Boise and back on the 25th to Shoshone. These specials are to be run for the Wallace circus that will show there on those dates.

The Free Kindergarten Association.

The Free Kindergarten Association will give an excursion to Garfield on July 24. The ladies engaged in the worthy work are: Mrs. McVicker, president; Mrs. Elmer B. Jones, first vice-president; Mrs. Egbert Roberts, second vice-president; Mrs. J. H. McConnell, third vice-president; Mrs. J. H. McConnell, fourth vice-president; Mrs. J. H. McConnell, fifth vice-president; Mrs. J. H. McConnell, sixth vice-president; Mrs. J. H. McConnell, seventh vice-president; Mrs. J. H. McConnell, eighth vice-president; Mrs. J. H. McConnell, ninth vice-president; Mrs. J. H. McConnell, tenth vice-president; Mrs. J. H. McConnell, eleventh vice-president; Mrs. J. H. McConnell, twelfth vice-president; Mrs. J. H. McConnell, thirteenth vice-president; Mrs. J. H. McConnell, fourteenth vice-president; Mrs. J. H. McConnell, fifteenth vice-president; Mrs. J. H. McConnell, sixteenth vice-president; Mrs. J. H. McConnell, seventeenth vice-president; Mrs. J. H. McConnell, eighteenth vice-president; Mrs. J. H. McConnell, nineteenth vice-president; Mrs. J. H. McConnell, twentieth vice-president; Mrs. J. H. McConnell, twenty-first vice-president; Mrs. J. H. McConnell, twenty-second vice-president; Mrs. J. H. McConnell, twenty-third vice-president; Mrs. J. H. McConnell, twenty-fourth vice-president; Mrs. J. H. McConnell, twenty-fifth vice-president; Mrs. J. H. McConnell, twenty-sixth vice-president; Mrs. J. H. McConnell, twenty-seventh vice-president; Mrs. J. H. McConnell, twenty-eighth vice-president; Mrs. J. H. McConnell, twenty-ninth vice-president; Mrs. J. H. McConnell, thirtieth vice-president; Mrs. J. H. McConnell, thirty-first vice-president; Mrs. J. H. McConnell, thirty-second vice-president; Mrs. J. H. McConnell, thirty-third vice-president; Mrs. J. H. McConnell, thirty-fourth vice-president; Mrs. J. H. McConnell, thirty-fifth vice-president; Mrs. J. H. McConnell, thirty-sixth vice-president; Mrs. J. H. McConnell, thirty-seventh vice-president; Mrs. J. H. McConnell, thirty-eighth vice-president; Mrs. J. H. McConnell, thirty-ninth vice-president; Mrs. J. H. McConnell, fortieth vice-president; Mrs. J. H. McConnell, forty-first vice-president; Mrs. J. H. McConnell, forty-second vice-president; Mrs. J. H. McConnell, forty-third vice-president; Mrs. J. H. McConnell, forty-fourth vice-president; Mrs. J. H. McConnell, forty-fifth vice-president; Mrs. J. H. McConnell, forty-sixth vice-president; Mrs. J. H. McConnell, forty-seventh vice-president; Mrs. J. H. McConnell, forty-eighth vice-president; Mrs. J. H. McConnell, forty-ninth vice-president; Mrs. J. H. McConnell, fiftieth vice-president; Mrs. J. H. McConnell, fifty-first vice-president; Mrs. J. H. McConnell, fifty-second vice-president; Mrs. J. H. McConnell, fifty-third vice-president; Mrs. J. H. McConnell, fifty-fourth vice-president; Mrs. J. H. McConnell, fifty-fifth vice-president; Mrs. J. H. McConnell, fifty-sixth vice-president; Mrs. J. H. McConnell, fifty-seventh vice-president; Mrs. J. H. McConnell, fifty-eighth vice-president; Mrs. J. H. McConnell, fifty-ninth vice-president; Mrs. J. H. McConnell, sixtieth vice-president; Mrs. J. H. McConnell, sixty-first vice-president; Mrs. J. H. McConnell, sixty-second vice-president; Mrs. J. H. McConnell, sixty-third vice-president; Mrs. J. H. McConnell, sixty-fourth vice-president; Mrs. J. H. McConnell, sixty-fifth vice-president; Mrs. J. H. McConnell, sixty-sixth vice-president; Mrs. J. H. McConnell, sixty-seventh vice-president; Mrs. J. H. McConnell, sixty-eighth vice-president; Mrs. J. H. McConnell, sixty-ninth vice-president; Mrs. J.
